Experience

TA for Psychological Statistics (PSYCH 308) (January 2023 - Present)

I really enjoy statistics, and recognize how important they are, especially in research and data analysis. Being a TA gives me the opportunity to master foundational concepts of statistics in the field of Psychology, and help other students learn and master them as well!

My responsibilities include organizing the course website to make sure it is easy to navigate for students, answer students' questions pertaining to statistics or the software we use in class, etc.

OrthoSelect - DIBS Lab Technician (May 2021 - Present)

OrthoSelect is an orthodontic lab in American Fork that specializes in creating 3D printed trays for orthodontists all across the world. The company provides a very helpful platform and service that makes the process of placing braces on a patient's teeth very fast and painless.

As a lab technician, I had the responsibility of creating the digital models of the trays that would later be printed and shipped to the doctors. I also assisted in the quality assurance and training of new technicians of my team. I played an important role in ensuring the production of our team was as effective and of the highest-quality possible.

Customer Service Associate- Home Depot (April 2020 - Sept. 2020)

During the summer, I worked at Home Depot at the customer service desk. I gained a lot of experience helping people place orders, return damaged products, and find solutions to various different problems. I also learned how to work effectively under pressure. There were many instances when it was very busy with lines of angry customers out the door. However, my fellow coworkers and I were able to work together as a team to take control of the situation and help everyone we could.

Missionary for The Church of Jesus Christ of Latter Day Saints: Salta, Argentina (Sept. 2018 - April. 2020)

I had the opportunity to work as a service missionary in Salta Argentina. During my service I learned how to speak Spanish fluently, work with and

train fellow missionaries, and ultimately learned skills and habits that will help me the rest of my life.

Part of my service included working in our mission headquarters office for 6 months. My responsibilities included inputting and analyzing data in various programs like excel, ordering and organizing the mission's supplies, traveling to different parts of the mission to help other missionaries, etc.

Education

BYU (Sept. 2020 - Present) GPA: 3.69

I am currently studying at BYU. I am in my fifth semester, studying Neuroscience. I feel very grateful to be able to study at BYU. It has been a great experience so far, and I look forward to all the opportunities it might present to me in the future.

Significant Coursework

STAT 121, PSYCH 308, 307, CHEM 105, 106, 107, 351, 352, MMBIO 240, CELL 120, 360, MATH 112, PSYCH 370, NEURO 205

Wasatch High School/ GPA 3.92 (2014-2018)

Honors Math, Honors English, Spanish 2 & 3, and Graphic Design 1 & 2, Math 1050-1060, English 1010, Political Science, Psychology 1010, Computer Programming 1 & 2.

Skills / Hobbies

Communication

All my past experience working in retail has taught how to effectively express myself to other people. It has taught me the importance of treating people kindly and patiently. Customer service has become one of my major strengths.

Computers

Throughout highschool, I took many computer-related classes. They helped me learn how to use various different kinds of software like excel, word, Adobe photoshop, Adobe illustrator, etc.

Outdoor Hobbies

Some of my biggest hobbies are outside-activities. In the winter, I love to ski. In the summer, I love to go hiking, wakeboarding, paddleboarding, fishing, etc.

Piano

Over the past year or so, I have gained a passion for playing the piano. I would still consider myself to be an amateur, but I have found playing the piano to be a great stress-reliever for me.
